1st Annual Meeting of the DisCo project

15th - 16th May, 2018

Halifax Hall, Sheffield (UK)

Collaborative Project within the
EUROPEAN COMMISSION / HORIZON2020

DisCo represents a logical follow-on from earlier Euratom projects (such as SFS, NF-PRO, MICADO, REDUPP and FIRST-Nuclides) which focused on dissolution and radionuclide release from conventional UO₂ spent fuels.

In particular, this project aims to fill the knowledge gap on spent fuel dissolution arising from the development and use of novel types of fuel (Cr/Al-doped and MOX).

The project started on 1st of June 2017 and will last for 4 years. It is implemented by a consortium with 16 Beneficiaries from 8 countries and the European Joint Research Center (EC). National Waste Management Organizations and Regulatory Authorities contribute to the running project by participation in the End-User Group, by co-funding Beneficiaries, and provide for knowledge and information transfer.

Meeting objectives

This meeting aims at providing a forum for discussion of scientific and technical project results, preparing for periodic reporting and planning on future project program.

The Project Annual Meetings contribute to integration within the project and communication with a broader interested community.
